Leek and Specialty Vegetable Cultivar Catalog

# Novagen Seed

## Summary

The text is an excerpt from a "Leek and Specialty Vegetable Cultivar Catalog" that details a wide variety of seeds available for sale, focusing heavily on leeks. The source immediately highlights the superior qualities of its leek varieties, noting they are frost and heat resistant due to deep root systems. It provides a comprehensive list of professional leek hybrids, such as the HY 014 Mako-Power F1 for three to four seasons, alongside notes on specific availability for 2025/2026 and even future offerings for 2027. Additionally, the catalog mentions historical leek varieties and offers leek hybrids for the hobby market, stating these are sold at cost. Finally, the source lists numerous other specialty vegetables and herbs, like Parsley Chrisphina Type Pearlé and Pearled Celeriac, while stressing the company's commitment to quality through third-party germination checks by companies like INCOTEC and Germaines.

## Full article

All our leek varieties have one big advantage over the competition: Frost resistant and very good against heat.

*Why is this:* our varieties have large roots and go deep into the turf. Varieties that are currently used to make hybrids and synthetic hybrids are not sold OP varieties.

FM 2007	Summer - autumn industry
FM 2002	Autumn – winter fresh market
FM 2009	Autumn – winter fresh market
FM 2001	Winter and late winter fresh market and industry
FM Trio	Autumn – winter

HY 049 Mako-Nice F1	Summer – Autumn
HY 071 Mako-Flash F1	Winter

### *Latest News:*

We are working on creating a synthetic leek hybrid that is resistant to Salsify, Antonia.

And now, what are we going to do?

The variety is in demand, especially in Europe.

We are not going to sell and create a new variety. They ask for something darker, and making a hybrid, such as Parsley Merveille Top, is in question. We have the seed, but it needs to be cleaned.

Parsley Chrisphina Type Pearlé,  
Pearled Celeriac Camus – Claire – Aruba - Vix & Rixco

Basil Roma Red Basil And some other small vegetables.

Novagen Seed

# **No quality. No delivery.**

ATTENTION : The leek hybrids and parsley are checked for germination energy after 6 days, and germination after 10 days by two companies each in their specialties : INCOTEC surcharge with possible "Priming" Germaines surcharge with either pilled or coated. The preparation of the seeds by these companies, possibly upgrading these costs, are borne by us. I supply quality seeds, no quality no delivery.
